## Subject: **Environmental Policy Statement**

Flexi-Cell (UK) Ltd is involved the manufacture of closed cell sponge blocks and the design, development and manufacture of elastomeric extrusions and fabricated components. These are supplied into a variety of sectors including the automotive and building/construction industries.

As a responsible manufacturer, Flexi-Cell (UK) Ltd recognises that effective environmental management is a key determinant to sustainable development in an ever more changing and challenging world.

Our aim is to establish and maintain commitment (at all levels) along with responsibilities and processes/procedures to ensure that all operations conform to legislative requirements and minimise any adverse environmental impact to the community.

### *Key principles of this will include:*

- **Establishing achievable objectives and targets in terms of waste & scrap**
- **Demonstrating measurable continual improvement in environmental performance by regular review**
- **Monitoring and controlling all processes and support activities that have an environmental impact**
- **Monitoring and controlling material usage**
- **Increase environmental awareness in training needs**

This policy is available to any interested external party and Flexi-Cell (UK) Ltd will play an active role in discussions with business, public and administrative bodies and other such relevant institutions.
